

Greenhorn Ranch Subdivision Residents

IMPORTANT NOTICES

Our Roads

Greenhorn's dirt roads are posted **15 mph**, not only is this for safety, it reduces road maintenance costs and keeps down the dust. The paved road is posted **35 mph**. A repeat speeder's license number can be reported to the CHP.

Drought Preparedness

The State has asked all Californians to voluntarily cut back **20%** of water usage. The entire state is well below normal rain and snow fall. Here is some interesting information and possible ways to cut back.

At the bottom of your quarterly water bill is the number of gallons used. You can calculate daily use by dividing with the number of day billed. Then see where you might cut back.

- * Average toilet uses 1.6 gallons per flush. (printed inside your tank)
- * Average dishwasher uses 3-5 gallons per cycle. Try to use when filled.
- * Hand-washing dishes, pots can use 20 gallons. A rinse cycle uses a fraction of that.
- * 4 minutes in the shower uses 20-40 gallons
- * Avoid plantings that require lots of water.

Online go to: www.eartheasy.com for more way to conserve water.
